

Professional Summary

Data and technology professional with 5+ years of experience across data analysis, reporting, software development, and business applications. Skilled in SQL, Power BI, Excel, Python, Pandas, Tableau, Power Query, and DAX, with hands-on experience in data extraction, cleaning, transformation, validation, reconciliation, dashboard development, and KPI reporting. Background also includes relational databases, APIs, system integration, testing, troubleshooting, and business applications.

Education

BACHELOR OF TECHNOLOGY | Pondicherry University | India 2016 - 2020
Major: Information Technology

Technical Skills

- **Data Analysis:** Data Cleaning | Data Transformation | Data Validation | Data Reconciliation | Data Quality | Discrepancy Investigation | Trend Analysis | KPI Analysis | Ad-hoc Analysis
- **SQL & Databases:** SQL | SQL Server | MySQL | Relational Databases | Data Extraction | Joins | Aggregations | Subqueries | CTEs | Window Functions | Database Management
- **BI & Reporting:** Power BI | Power Query | DAX | Data Modelling | Dashboard Development | KPI Reporting | Management Reporting | Tableau | Zoho Analytics
- **Python:** Python | Pandas | NumPy | Data Cleaning | Data Transformation | Exploratory Data Analysis
- **ETL & Integration:** ETL | Data Extraction | Data Transformation | Data Integration | REST APIs | JSON | API Testing | System Integration
- **Excel:** PivotTables | VLOOKUP/XLOOKUP | Conditional Formatting | Data Validation | Reporting & Analysis
- **Other:** Requirements Gathering | System Testing | Output Validation | Workflow Automation | Process Improvement | Troubleshooting

Work Experience

MEDIA AND MARKETING COORDINATOR (DATA & REPORTING)
Dolphin Group | Abu Dhabi, UAE February 2025 – August 2026

- Consolidated business and operational data from multiple internal and external sources for reporting and analysis.
- Developed and maintained Power BI dashboards and reports covering KPIs, project progress, timelines, and operational performance.
- Used Power Query to clean, transform, and structure datasets for recurring reporting.
- Performed data validation and reconciliation checks to identify missing, inconsistent, or mismatched information.
- Investigated discrepancies between source data and reported figures and coordinated corrections with stakeholders.
- Analyzed KPIs, trends, variances, and performance gaps to identify areas requiring attention.
- Prepared recurring and ad-hoc reports for management and business teams.
- Gathered reporting requirements and translated them into dashboards and reporting outputs.
- Improved recurring reporting processes, reducing manual reporting effort by approximately 50%.
- Maintained reporting datasets, trackers, and documentation.

IT ASSISTANT – SOFTWARE SOLUTIONS
Dolphin International General Trading – L.L.C – S.P.C | Abu Dhabi, UAE August 2024 - February 2025

- Collected, consolidated, cleaned, and validated business data for operational and management reporting.
- Developed and maintained 10+ reports and dashboards using Zoho Analytics.
- Investigated reporting discrepancies by tracing reported figures to source data and application workflows.
- Configured 8+ automated workflows, reducing manual processing time by approximately 30%.

- Gathered user requirements and translated them into reporting and workflow solutions.
- Supported system testing and validated reporting outputs against expected results.
- Investigated data and application issues and worked with business users and technical teams to resolve them.
- Maintained documentation for reports, workflows, testing, and internal systems.

SOFTWARE ENGINEER

Unisoft Global Services Pvt Ltd | Mangalore, India

November 2020- February 2024

- Used SQL for data extraction, querying, validation, database operations, and application reporting.
- Developed SQL queries using filtering, joins, aggregations, and other query operations.
- Worked with SQL Server, MySQL, relational databases, and structured business data.
- Investigated data inconsistencies across application workflows and system integrations.
- Developed and tested REST API integrations and validated request, response, and JSON data.
- Performed data validation to check accuracy, completeness, and consistency across system integrations.
- Investigated application and data-related issues and supported root-cause analysis and resolution.
- Developed and supported database-driven business applications.
- Analyzed business and system requirements and translated them into technical solutions.
- Supported system testing, troubleshooting, and issue resolution throughout the SDLC.

Projects

COFFEE SHOP SALES ANALYSIS BREAKDOWN | Python / SQL / Power BI / Tableau | Personal Project 2026

- Queried and analyzed 3,500+ sales records using SQL.
- Used aggregations, CTEs, window functions, rankings, running totals, and time-based analysis.
- Cleaned and explored transaction data using Python and Pandas.
- Analyzed revenue, product, payment-method, and time-based trends.
- Developed Power BI and Tableau dashboards to communicate KPIs, trends, and actionable business insights.
- Created visual reports to support performance monitoring and commercial decision-making.

AIRBNB DATA DASHBOARD | Power BI | Personal Project

2026

- Cleaned, transformed, and validated property data using Power Query.
- Built a structured data model for analysis and reporting.
- Created DAX measures and KPIs for pricing, availability, listings, and location analysis.
- Developed an interactive Power BI dashboard and validated outputs against source data.

AMAZON PRODUCT DATA ANALYSIS | Python / Pandas | Personal Project

2026

- Extracted and structured product information using Python and web/API techniques.
- Cleaned and transformed datasets using Pandas.
- Performed data-quality checks to identify missing and inconsistent information.
- Analyzed product and pricing data to identify trends and patterns.
